Programming Languages / Frameworks: HTML, CSS, JavaScript, Java, NodeJs, MongoDB / Mongoose, C++, MySQL

Expose Languages / Frameworks: Springboot, Kotlin, Dart / Flutter, C#, PHP

Development: Git, (exposed) Android Studio, Heroku

PROJECTS

Where on Earth is Waldo? | whereonearthiswaldo.herokuapp.com | geofactsapi.herokuapp.com

- An interactive 3D-globe application where users attempt to locate Waldo; and accompanied by my custom-built API to grab various information from a server, this application was created to help (me and) others strengthen their geographical knowledge and skills. Users can set different options to find Waldo: by country facts; by country name; by country flags; by country capitals.

Inventory Tracker | Java - MySQL - JavaFx

- Created for businesses to achieve increased productivity all while tracking and recording products.

School Management System | Java - MySQL - JavaFx

- Application that would facilitate that of a school system, allowing administration and students access.

Text-to-Speech Google Chrome Extension

- Extension created to facilitate web-reading. Serves the purpose of reading long texts and aid those

Quiz Application(s) | HTML - CSS - JavaScript - PHP - MySQL

- Web application allowing users to increase knowledge in various self-selected topics. Useful when studying.

Rest API Web Application | HTML - CSS - JavaScript

- Fetches data from API endpoints, saving them to a database and then populating it onto the webpage.
- It allows for performing CRUD operations, allowing a better understanding and working with APIs.

Ice Cream Sunadae Order Application | Java/Kotlin - Dart/Flutter

- Implemented with both a binary tree and linked list, users can make orders on various ice cream types and flavors.

User-generated Reflection Application | Mern Stack - Mongoose - Express - React - NodeJs

- Media application that allows users to share their most important moments, with various CRUD functionalities.

Space Battle 2D Game | Unity 2D - C#

- Users control a spaceship and fight off enemies. It consists of enemy waves, power-ups, and bosses.
